Description of Intervention
<p>This initiative invites the whole school community to focus on energy usage in all areas of the word. The day will showcase a combination of energy related exhibitors and some speakers in area of energy efficiency.</p>

Commented [ED1]: Provide a

Impact Measurement
<p>After the energy awareness day, a survey will be taken to see whether staff and pupils within the school community participated in the initiative and if people engaged in the exhibitions and information presented on the day.</p> <p>A quiz is an alternative fun way of seeing if participants interacted with the content presented in the exhibition alongside speakers.</p>

Facilitators	Barriers
The school Committee alongside the ENERGE committee will conduct the quiz/surveys and interpret the results.	Self-efficacy issues and apathy

Intervention Process

1. Energy Awareness Day should be held on energy/sustainability week.
2. Once the designated day has been chosen the school committee alongside the ENERGE committee will find appropriate guest speakers and exhibitions e.g. SEAL, Irish Savers LED Lighting, LH Heating, Warmer Homes Scheme and Teagasc.
3. Once energy efficient initiatives/companies have been confirmed to attend the energy awareness day in the school, posters and announcements should be made to ensure the school community marks the date.
4. A timetable should be produced which details what time each speaker will be present and on what subject regarding energy efficiency.
5. The day after the designated energy awareness day, students and staff will fill out a survey/quiz so that feedback can be received on how educational and informative the day was.
