Description of Intervention
Recycling paper helps to reduce greenhouse gas emissions that can contribute to climate change. It takes 70% less energy and water to recycle paper than to create new paper from trees.

Commented [ED1]: Provide a

Impact Measurement
6 months after the intervention is introduced; paper products invoices should be compared against invoices of non-recycled paper (prior to the intervention's implementation). The price difference should be noted to see if the school can financially afford the intervention for the school year.

Facilitators	Barriers
School management should find an appropriate supplier for recycled paper.	Cost

#### Intervention Process

1. School management must decide on what affordable supplier they will use for the recycled paper.
2. Delivery dockets/invoices will be filed and analysed after 6 months of the intervention's introduction.
3. After observations have been made; the school must decide if the intervention is worthwhile regarding cost and the environmental factors.

#### School Comments/Notes
