### Description of Intervention

Local, naturally made cleaning products are products are biodegradable, non-toxic and made of sustainable packaging. They're also safe products which is hugely important for a school environment. Green cleaning products help lessen air and water pollution.

Commented [ED1]: Provide a

### Impact Measurement

After 3 months of using the green cleaning products, the cleaners will be asked for feedback on their opinion of the products. They will compare them to the previously used products and gauge whether this intervention is up to the education sectors standards of cleanliness and sanitisation especially amid the Covid-19 epidemic.

If the green cleaning product utilise less/ more product in order to clean the school facilities to the standard required, it must be noted by the cleaners when they sign and date the cleaning of the facilities.

### ENERGE Intervention Strategy

Facilitators	Barriers
<p>The school management must decide on an appropriate supplier for the green cleaning products.</p> <p>The cleaners will utilise these new products and account for the quality and quantity of product required for each clean.</p>	<p>Self-efficacy issues</p> <p>Apathy</p>

Intervention Process
<ol style="list-style-type: none"> <li>1. School management will choose an appropriate and affordable supplier for the cleaning products.</li> <li>2. The cleaners must be informed of the change in products and will have to give feedback of quantity used and the quality of the products.</li> <li>3. After 3 months; the cleaners reviews of the products will be inspected to ensure the school has the most cost effective and efficient cleaning products.</li> <li>4. If the green cleaning products are successful then they will continue to be used but if bad feedback is given then the school will have to re- evaluate their decision.</li> </ol>
